

Capability Statement

We provide exploration expertise combined with extensive experience safely operating in remote and austere environments.

ROKH Exploration and Equipment

Rokh Exploration and Equipment (ROKH) provides exploration and associated services across Australia and Internationally.

Our management team includes leading Australian geologists, mining and resources experts and recently serving senior Army Officers. Our unique selling point is our ability to provide exploration expertise combined with extensive experience safely operating in austere environments.

Management of Data

ROKH exploration data management is managed through state-of-the-art computer hardware and software systems and our in-house senior geologist and field technicians provides quality assurance.

Safety Systems

ROKH employs a range of safety systems to ensure field staff are protected while operating in remote locations.

This includes:

- Primary and alternate remote communications systems.
- Maintained late model mine-spec vehicles and accommodation platforms.
- Safety procedures.
- Primary and alternate geo locating platforms.
- On-call 24/7 medical and evacuation systems.
- Medical and heat safety procedures.
- All staff receive annual pre-employment medicals and undergo regular alcohol and drug testing.

Our Services

Remote site soil sampling

- Collection of soil samples to your company specifications
- Orientation survey sampling
- Efficient and accurate collection of samples
- Assistance with sample program planning
- Exploration rehabilitation

Drill site supervision

- Drill site set up and clearing supervision
- Access track route finding and clearing
- RC/AC/RAB sampling and supervision
- Diamond rig supervision, core orientation and markup
- Safe collection and transport of samples and core to final destination

Exploration data management

- Collection of sample data using the latest technology
- QA/QC of all sampling data before submitting to client
- Digital tracking to sample locations and backup systems in case of failure

Remote site camp establishment including the provision of:

- Accommodation
- Catering Services
- Medical Support
- Remote communications - voice, data and tracking (satellite, HF and UHF).
- Computer networks and systems

Exploration vehicles and equipment

- Mine spec 4WD's and trucks
- Water and fuel systems
- Fire mitigation practices and equipment

Supporting the Veteran Community

ROKH employs field staff from the Australian Defence Force Veteran community or with extensive exploration experience.

This means you're supported by a field team with extensive experience safely and effectively operating in remote austere environments. All staff are internally trained by our in-house senior field technicians and geologists. Our team are mine-site ready and we are happy to comply with all site requirements you may have.

Defence Force Veteran Field Staff bring the following skill sets to your program:

- Experienced operating in austere environments.
- Trained in navigation and the use of GPS systems.
- Advanced first aid training.
- Government trained in off-road vehicle operations.
- Trained in heat illness mitigation.
- Trained in UHF, VHF, HF and Satellite communications.
- Small team leadership experts, including:
 - Scheduling and adhering to daily work programs.
 - Safety reporting procedures.
 - Risk management.

ROKH Management Team

The Senior Management Team consists of Directors and Senior Geologists with extensive exploration experience running remote field teams and drilling programs across Australia and Internationally.

Jason O'Keefe *Managing Director*

Jason holds a Bachelor of Commerce and is a graduate of the Royal Military College, Duntroon and the Australian Defence Force Staff College (Senior Leadership).

He has extensive experience in deploying and managing teams in remote locations around the world. He has supported mining and resources entities with medical, security and emergency response staff across Australia, South-East Asia and Africa.
